WARNING

This document contains classified information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793 and 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive TALENT-KEYHOLE information. Its security must be maintained in accordance with KEYHOLE and TALENT regulations.

PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1c (DIA). The photographic analysis for this particular report was performed by the Production Center 1P1c.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

A probable ammunition storage area is located approximately 10 kilometers (km) south-east of the city of Kolomyia (Figure 1).

In and around the area are several tertiary roads, with one extending approximately three km south with direct access to the main Kolomyia-Chernovtsy road. The Kolomyia-Chernovtsy railroad is also located approximately three km south of the probable ammunition storage area, extending generally east to southeast, and west to northwest. Five km northwest of the installation is the Kolomyia Airfield, with a 6,600- by 250-foot concrete runway.

Within the installation (Figures 2 and 3) are two probable support buildings and eight probable ammunition storage buildings. All of these buildings are within a security fence. A possible firebreak surrounds the entire installation. A tertiary road enters the installation from the east, joining another road, which leads to a shipping and receiving area located on the northeast portion of the installation.

KEYHOLE photography between [REDACTED] reveals no significant changes within the installation.

DESCRIPTION OF INSTALLATION

Railroad Service

There is direct access to the Kolomyia-Chernovtsy railroad one km south of the storage area.

Road Service

There are several tertiary roads in and around the storage area. The main Kolomyia-Chernovtsy road is approximately one km south of the storage area.

Aircraft Landing Strip

There are no landing strips in or around the area; however, the Kolomyia Airfield is approximately five km northwest. The runway has a concrete surface and is 6,600 by 250 feet.

Ammunition Storage Area

Area F contains two probable support buildings, one 180 by 60 feet and one 170 by 50 feet, and eight 60- by 50-foot probable ammunition storage buildings.
